MEDICAL CLINIC

A Doctor Visit with BMC

Sometimes I will need to visit the doctor for a check-up or if I am not feeling good.

We will park in the parking lot and walk into the clinic.

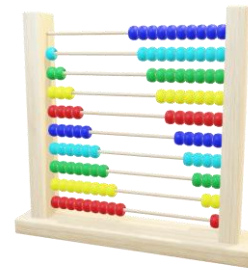

I will either walk up the stairs or take an elevator to get to the kid's part of the building.

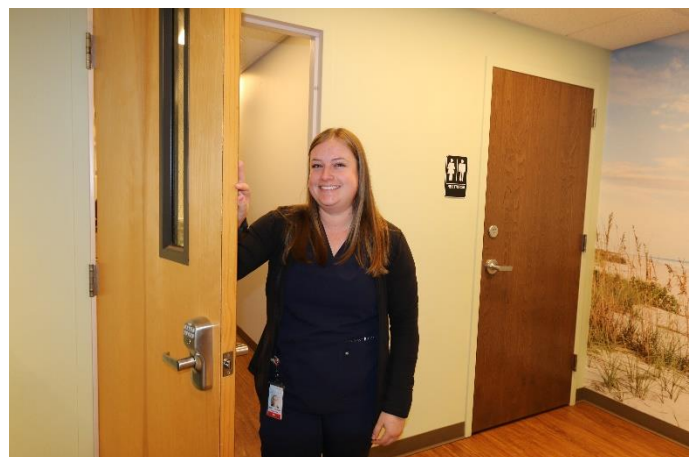

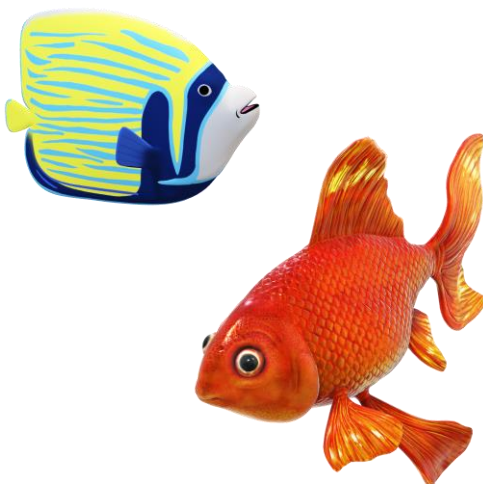

We will check in at the front desk and they will ask my name.

I will then wait in the waiting room until a nurse comes and calls my name. While I am waiting, I might look at the fish, look at a book or show, play with a toy, or ask to play with the fidget toys.

The nurse will come out and call my name. I will walk into the other part of the clinic with my parent.

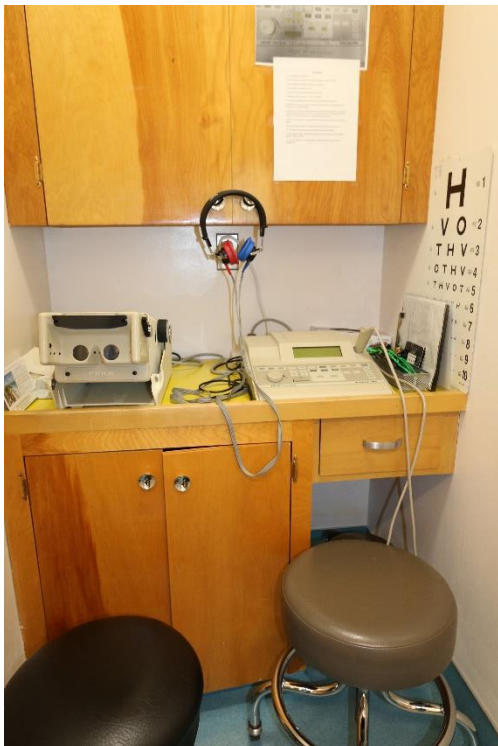

I may need to stand on a scale to get weighed. The nurse might also measure how tall I am.

Sometimes, I will have my blood pressure taken. A special bracelet is put around my arm and gives it a squeeze. It doesn't last too long, and then it is all done.

For checkups, I may go get my vision and my hearing checked.

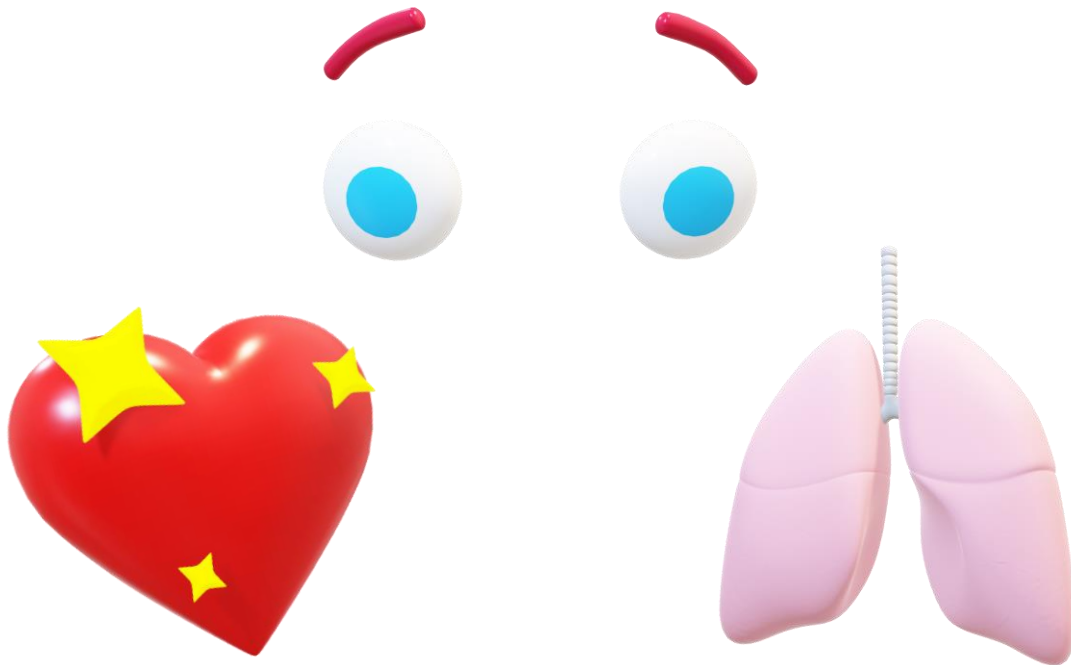

Once the nurse is all done with the measuring,
I wait in the exam room for the doctor to come in.

The doctor will come in and say hello. They will talk to my parent(s)
and me to see if there are any questions or concerns.

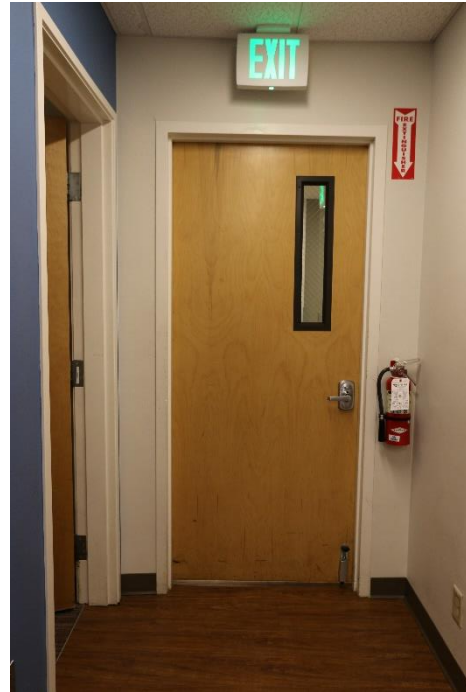

Then they will do an exam. They may look at my eyes, nose, mouth and sometimes my ears. It can feel funny, but it shouldn't hurt. They will also use their stethoscope to listen to my heart and lungs and tummy. They may also have me lie down to feel my tummy.

Sometimes I will need a shot to keep me healthy.
It is a quick poke and then all done!

When my appointment is all finished, I can chose to get a sticker or a treat or something else with my parent. Then I get to leave the office until next time!

**Thank you for visiting us at
Broadway Medical Clinic!
See you next time!**
